PROJECTS

Portfolio(Link) | *Python 3, Django*
- Added backend to my portfolio so that if I want to change the pictures of my portfolio I can change them easily. I also implemented a feature to keep track of someone's IP address if someone wants to log in except me.

E-Commerce(Link) | *Python 3, Django*
- Implemented a responsive e-commerce solution using Django. Integrating many features such as login, logout, authentication, cart, and CRUD.

To-do list(Link | *Python 3, Django*
- Implemented a to-do list to keep track of my tasks using Django.

Blog-App(Link) | *Python 3, Django*
- Implemented a blog app where someone can post their blog, read other's blog posts, and delete and update their blogs.

Employee Management System(Link) | *PHP, Laravel*
- Developed a comprehensive employee management system in Laravel for university SD (Software Development) course, keeping records of their employees, employees can update their information, and admin can manage their employees.

Library Management System(Link) | *PHP,*
- Developed a comprehensive library management system in PHP for university DBMS (Database Management System) course, keeping records of their books and students, admin can update book's information and student information, and admin can keep track of students' issues book and when they were issued.
